

CASE STUDY

Verito's Excellent Customer Service Boosts Bookkeeping Firm's Productivity

Verito Private Cloud helped Bookkeeping Solutions cut IT costs and scale by providing excellent customer service.

SOFTWARE HOSTED

- UltraTax
- Quickbooks
- CS Professional Suite
- Sales Tax Express

BACKGROUND

Hannah Stricker founded Bookkeeping Solutions of Traverse City to help small businesses with their bookkeeping, accounting, and tax questions. They offer full-service bookkeeping, outsourced controller, outsourced CFO, tax services, training & setup, and other services.

CHALLENGES

Hannah previously worked with almost every Cloud Provider, but none of them exactly met her needs. She says, "I had tried nearly every cloud server out there trying to find one that would do what I needed. I needed a cloud server that would support two monitors, host multiple programs, 24 hrs. support."

Hannah has six users from her office that require cloud access in addition to sixteen additional client users hosted. She needed to customize their access settings so her clients could only see their books while her employees could see all of their client's books to provide them the excellent service her firm is known for.

Many cloud firms offered some of the services she required but fell short in the service department. She needed support that was available 24/7/365 to solve any problems that arose.

At a Glance

BACKGROUND

- Full-Service Tax and Accounting Firm
- They offer full-service bookkeeping, outsourced controller, outsourced CFO, tax services, training & setup, and other services.

CHALLENGES

- Previously worked with nearly every major Cloud Provider but none perfectly met her needs.
- She needed 24-hour service to solve any problems as soon as they arose.

SOLUTION

Hannah knew what she needed from a cloud provider: customer service that is knowledgeable of her programs, dual-monitor support, and speed. Verito Cloud provided a solution that was faster and more affordable than the competition.

She says, "Verito appeared they could do all the things I needed at a very cost-effective price. I'd already tried Abacus, Cloud 9, Right Networks, Virtual Office, Insynq, and a couple more small ones." Verito's turn-key Tax and Accounting solution was a perfect fit for her software needs.

She uses Ultra Tax, File Cabinet, QuickBooks, TaxTime USA, Fixed Assets, Planner CS, Drake, and Splashtop.

RESULTS

Verito Cloud moved Hannah's data from her existing cloud provider to their private cloud in a few days. Once her private cloud was set up, she worked with a Verito Certified Pro to verify that everything was set up to her satisfaction.

She says, "Verito has been great. Support is by far the best. Switching cloud servers took about 2 or 3 days to move 250 gigs of data, and 25 programs." Since partnering with Verito, the firm's team has benefited significantly from vastly improved 24x7 tech support response times.

By transitioning to Verito Cloud, Bookkeeping Solutions now enjoys 99.9% up-time, faster tech support response times from Certified Pro engineers, and significantly improved, more proactive infrastructure management across hosting, security, and system maintenance

SOLUTION

- Verito's Turn-Key Tax and Accounting Solution perfectly met her software needs
- Verito's 24/7/365 Customer Support was an essential selling feature for Hannah
- Verito Private Cloud proved to be a faster and cheaper solution than the competition

RESULTS

- Hannah rests easy knowing her server is in good hands and support is just a call away any time she needs it.
- Increased customer service and satisfaction due to enhanced mobility and connectivity.

I would definitely recommend to someone else, and often do. Verito support is better than most product support, and their cloud is hands down the best I've ever used.
